WELCOME TO THE WALL

How this planner works

Motivation fades. Discipline doesn't. This planner gives you a proven 30-day system: 3 lifting days per week, full-body training, and a daily log so every single rep is accounted for. You don't need to be motivated — you just need to show up and write it down.

HOW TO USE THIS PLANNER

1. Train 3 days per week.

Monday / Wednesday / Friday works best. Rest or walk on the other days. The program alternates Workout A and Workout B.

2. Log every session.

Each of the 30 days has its own log page. Write the weight, sets, and reps you actually did — not what you planned.

3. Progress every week.

If you hit all your reps with good form, add 2.5–5 lbs (1–2 kg) next session. Small jumps, forever. That's how beginners grow fast.

4. Rest 60–90 seconds between sets.

Longer (2–3 min) on squats and deadlifts is fine.

5. Warm up first.

5 minutes of light cardio, then 1–2 light warm-up sets of your first exercise before your working sets.

6. Form beats ego.

If your form breaks down, the weight is too heavy. Drop it. The Wall doesn't care what number is on the bar.

SAFETY FIRST

This program is general fitness education, not medical advice. If you have injuries, health conditions, or are new to exercise, check with a healthcare professional before starting. Stop any exercise that causes sharp pain.

THE PROGRAM

Full-body training - alternate Workout A and Workout B

Seated Cable Row (or DB Row)	3	10-12	Squeeze shoulder blades
Dumbbell Shoulder Press	3	10-12	Don't arch lower back

YOUR 30-DAY SCHEDULE

Week 1: Mon A • Wed B • Fri A Week 2: Mon B • Wed A • Fri B

Week 3: Mon A • Wed B • Fri A Week 4: Mon B • Wed A • Fri B

Days 29-30: Re-test week — repeat Workout A and B and compare your Day 1 numbers.

Off days: 20-30 min walk, stretching, or complete rest. Recovery is training.

EXERCISE LIBRARY

Form cues that keep you safe and strong

BARBELL BACK SQUAT

Bar on upper back, feet shoulder-width. Brace your core, sit down and back until thighs are parallel, drive up through your whole foot. Beginner sub: Goblet Squat holding one dumbbell at your chest.

BENCH PRESS

Feet flat, slight arch, shoulder blades pinched. Lower the bar to mid-chest with control, press up and slightly back. Beginner sub: Dumbbell Bench Press for safer solo training.

ROMANIAN DEADLIFT (RDL)

Soft knees, push hips back, slide the bar/dumbbells down your thighs until you feel a hamstring stretch. Flat back the entire time. Squeeze glutes to stand.

SEATED CABLE ROW / DUMBBELL ROW

Chest tall, pull the handle to your stomach, squeeze shoulder blades together for one second, release with control. No jerking.

LAT PULLDOWN

Grip slightly wider than shoulders. Pull the bar to your upper chest while keeping your torso mostly upright. Control the way up — that's half the exercise.

DUMBBELL SHOULDER PRESS

Seated or standing. Press dumbbells overhead until arms are straight, lower to ear level. Ribs down, glutes tight — don't lean back.

LEG PRESS / SPLIT SQUAT

Leg press: feet shoulder-width on the platform, lower until knees are ~90 degrees, never lock knees hard. Split squat: long stance, back knee drops toward floor.

PUSH-UPS

Hands under shoulders, body in one straight line. Chest touches the floor every rep. Too hard? Elevate your hands on a bench. The standard never drops — the range does.

PLANK

Forearms down, squeeze glutes and abs like someone's about to punch you. If your hips sag, the set is over.
